PROFESSIONAL SUMMARY

IT leader and hands-on technology architect with 20+ years of experience spanning enterprise infrastructure, networking, software delivery, data platforms and technical operations. Currently leading IT in private healthcare, combining strategic ownership with direct engineering of secure services, internal applications and automation. Experienced in connecting clinical and administrative workflows with analytics, resilient infrastructure and business systems.

SELECTED DELIVERY HIGHLIGHTS

- Designed the SAYANA internal operations ecosystem, including an executive command center integrating finance, HR, operational metrics and system-health indicators.
- Developed an HR and FaceID automation platform integrating employee lifecycle events, attendance, work schedules, leave approvals, Telegram workflows and reconciliation.
- Built MIS-focused reporting and data-quality workflows using SQL, MySQL and PostgreSQL to support financial and operational decision-making.
- Administered and optimized a centralized Hikvision surveillance environment with more than 200 cameras and multiple viewing stations.

PROFESSIONAL EXPERIENCE

Head of IT Department | AkfaMedline / VohaMedline

April 2024 – Present

- Lead IT operations, infrastructure, support and technical modernization within a private healthcare organization.
- Manage enterprise LAN/WLAN, Active Directory, Windows and Linux servers, internal DNS, secure HTTPS, VPN, VoIP, CCTV and operational monitoring.
- Architect and deliver internal web platforms and automation using Python/FastAPI, React, Docker, PostgreSQL/MySQL and REST APIs.
- Develop executive dashboards, finance workflows and integrations between medical, administrative, HR and attendance systems.
- Establish observability, incident diagnostics and KPI-oriented approaches to improve operational control.

PROFESSIONAL EXPERIENCE — CONTINUED

3D Modeler & IT Specialist | PROEKTPRO LLC

August 2019 – March 2024

- Created architectural 3D visualizations while maintaining workstations, local networks and office technology.
- Supported hardware, peripherals and connectivity across design and production workflows.

IT Specialist | Me'mor Architecture Service

September 2018 – March 2019

- Administered the corporate website, internal network and end-user IT environment.

Freelance Web Developer & Database Administrator | Self-employed

January 2013 – April 2017

- Developed and maintained websites and database-backed applications; worked with clients on requirements, support and improvements.

EARLIER EXPERIENCE

1999–2013 | IT engineering and technical operations in transportation, manufacturing, education, media and private-sector environments; roles included Technical Director, IT Engineer, IT Support Specialist and database/web administration.

CORE TECHNICAL CAPABILITIES

Leadership & healthcare IT IT strategy, digital transformation, team coordination, MIS integration, KPI frameworks, incident management.

Infrastructure & security Linux, Windows Server, Active Directory, DNS, Aruba LAN/WLAN, VLANs, Kerio Control, VPN, VoIP, HTTPS/PKI, Hikvision CCTV.

Software & data Python, FastAPI, Django, Flask, C#, JavaScript, React, REST APIs, PostgreSQL, MySQL, SQL, Git/GitHub.

Platform, monitoring & automation Docker, Nginx, Grafana, Zabbix, FaceID systems, Telegram integrations, AI-assisted workflows.

PROFESSIONAL TRAINING & CERTIFICATIONS

Python Full Stack Web Developer — SkillFactory (2023) | Website Administration — LAUR (2005)

IBM PC Maintenance — LAUR (2004) | 3Ds Max Graphic Design — LAUR (2004) | PC Operator — Istiqlol Business School (1999)
